

Personal Psychological Equalizer

Imagine that different qualities of the mind work like sliders on a music equalizer. None of these qualities are completely good or bad. What matters is the level at which they operate in your life. Choose the level that feels sustainable and realistic for you right now.

Instructions

1. Each scale runs from 1 to 10.
2. You cannot choose 0 or 10 on any scale.
3. At least three sliders must fall between 4 and 6.
4. At least two sliders must be below 5.
5. Choose levels based on what feels sustainable in real life, not what you think is ideal.

Trait	Meaning	Scale (circle a number)
Growth ↔ Contentment	1 = satisfied with where I am 10 = constantly improving	1 2 3 4 5 6 7 8 9 10
