

Personal Psychological Equalizer – Visual Sliders

Think of each quality below like a slider on a music equalizer. None of these traits are completely good or bad. The goal is to choose the level that feels sustainable and realistic for your life right now. Circle or mark the position on the scale that fits best.

Instructions

- 1. Each scale runs from 1 to 10.
- 2. You cannot choose 0 or 10 on any scale.
- 3. At least three sliders must fall between 4 and 6.
- 4. At least two sliders must be below 5.
- 5. Choose levels based on what feels sustainable in real life, not what you think is ideal.
